

# Introduction to Density

# What is Matter?

Matter is anything that has mass and takes up space.

# Properties of Matter

Matter has both physical and chemical properties.

# Chemical Properties

**WARNING:  
TOXIC**

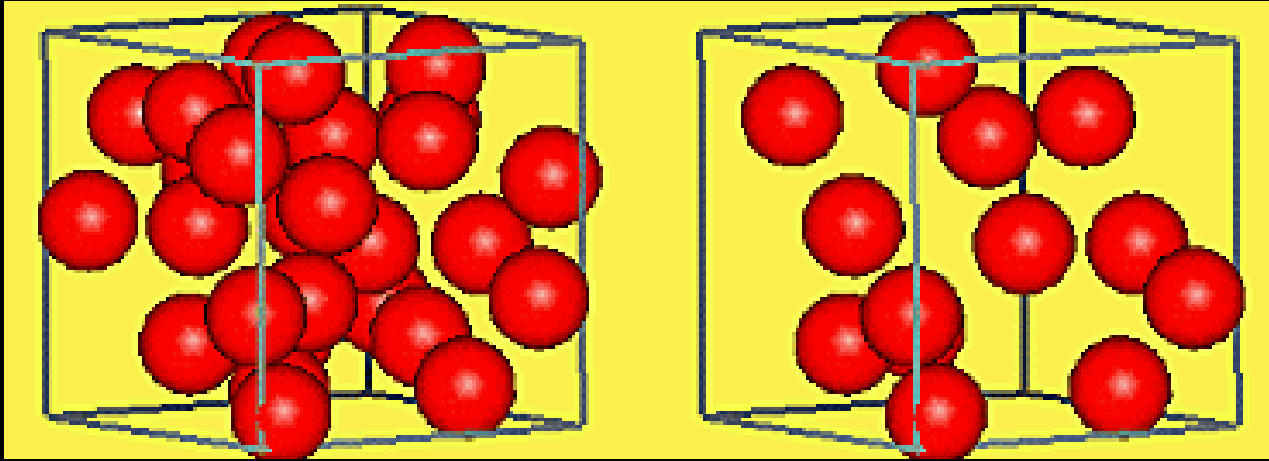

**Toxicity, flammability, corrosion**

# Physical Properties

Texture, hardness, color, taste,  
temperature, odor and density

# What is Density?

Density is a comparison of how much matter there is in a certain amount of space.

# Examples of Density

# YouTube Density Tower
