

## Learning Objectives

Identify the interactions that occur within communities

## Competition

Competition - two organisms fight for the same resources

### Predation

Predation - one organism captures and feeds on another organism

#### Symbiosis

Symbiosis - a close ecological relationship between two or more organisms of different species that live in direct contact with one another

### 3 Types of Symbiosis

Mutualism Commensalism Parasitism

### Mutualism

Mutualism - both species benefit from the relationship.

#### Commensalism

Commensalism - One member benefits and the other is neither helped or harmed

#### Parasitism

Parasitism - One organism lives on or inside another organism and harms it

YouTube Symbiosis

## Stop Here

# Ecology - Part 5

# SPECIES MERCENS

#### Habitat

Habitat - Place where an organism or community of organisms live, including all living and non-living factors or conditions

#### Niche

Niche is the functional role a species plays in a community. It includes how a species uses and affects its environment.
